

Specification

| Items                     | Value                            | Unit   |
|---------------------------|----------------------------------|--------|
| Pixel Size                | 18.5x18.5                        | μm     |
| Image Pixel               | 1204x1612                        | pixels |
| Active Pixel Array        | 1200x1600                        | pixels |
| Active Area               | 22.2x29.6                        | mm     |
| ADC                       | 12、14、16                         | bit    |
| Shutter Type              | Rolling shutter and global reset |        |
| Dynamic Range             | 70~93.1                          | dB     |
| True Line Pair Resolution | 12~14                            | lp/mm  |
| Dark Current @25℃         | 900                              | e-/sec |
| Full Well                 | 3600                             | ke-    |
| Data Output               | USB2.0                           |        |
| Power                     | 350                              | mW     |
| Chip type                 | APS COMS                         |        |
| Substrate                 | Aluminium Oxide Ceramics         |        |
| Operative Temperature     | 0~40                             | ℃      |

- Remarks:
- 1、 Full Well: It is the largest range that the current chip can support
  - 2、 Data Output: X5000 is with USB2.0 output
  - 3、 Frame Rate: Different frame rate outputs can be chosen for different applications. X5000 can support 1f/s and 2.5f/s
  - 4、 ESD: X5000 has 8kV anti-static capability

Product Dimension (unit: mm)

RWD Life Science Co.,Ltd

Add: 19-20/F, Building 7A, Shenzhen International Innovation Valley, Dashi 1st Road, Nanshan District, Shenzhen, Guangdong, P.R. China    Enquiries: market@rwdstco.com

RWD Life Science Inc.

Add: 850 New Burton Road, Suite 201, Dover, DE 19904 (New Office)

RWD 兽用x线摄影系统-产品彩页V1.0-200805-EN

Veterinary  
Dental X-ray

Using the international advanced technology, efficient integrated design

Microcomputer intelligent control, not only remote controlled exposure

Micro focus technology, much more clear image

More powerful function of low voltage alarm and high voltage protection

Can use lightroom dental film, imaging in one minute

High heat capacity tube to meet uninterrupted exposure shooting needs

RWD Vet Anesthesia, Easy & Safe

## D-X8V Mobile Veterinary Dental X-ray

### D-X8V Specifications

|  |   |
|--|---|
| Power supply                                 | 220V±10%,50HZ,1 KVA                                     |
| Tube voltage                                 | 70KV  |
| Tube current                                 | 8mA   |
| Focus size                                   | 1.5mm   |
| Total filtration                             | 2.5mmAL   |
| Exposure time                                | 0.2-4s  |
| Leak radiation                               | outside one meter 0.002Mg/h(national standard:0.25Mg/h) |
| Package size                                 | 144 x 50 x 27(cm)                                       |
| Net weight                                   | 50kg  |
| Intraoral digital imaging system is optional |   |

## D-X2V Portable Veterinary Dental X-ray

- Small size. light weight. portable
- With memory storage function, only one exposure can permanently memorize the exposure parameters
- 0.4mm \* 0.4mm dual focus configuration, which makes the image clearer and the diagnosis more accurate
- High-frequency power supply•Low radiation•Good-looking appearance
- Can use lightroom dental film, imaging in one minute
- Backlit LCD screen design
- Intraoral digital imaging system is optional

### D-X2V Specifications

|                             |                              |
|-----------------------------|------------------------------|
| Tube voltage:               | 60KV                         |
| Focus size                  | 0.4mm*0.4mm                  |
| Exposure time               | 0.2-3.2s                     |
| Battery                     | 14 8V 6600mAh                |
| Focal spot to skin distance | 140mm                        |
| Package size                | 280 x 270 x 250mm            |
| Tube curren:                | 2mA                          |
| Frequenc                    | 300KHz                       |
| Charge voltage              | AC100V-240V 50/60Hz          |
| Leak radiation              | Outside one meter≤0.002mGy/h |
| Net weight                  | 2.6kg                        |
| Gross weight                | 5.0kg                        |

## X5000 CMOS Image Sensor For X-Ray

X5000 apply to X-ray digital image acquisition for human dental,veterinary dental and industrial NDT. The CMOS sensor chip is with 18.5 X 18.5  $\mu\text{m}$  pixel size and totally 1.92 Mega pixels (1600 X1200), coupled with 6 $\mu\text{m}$  FOP to improve the image resolution and to prevent the X ray radiation for the CMOS chip and peripheral circuit so as to extend the product life. The HR GOS scintillator used is effectively balance the output sensitivity and the resolution. X5000 has USB readout circuit and corresponding cable .

### Parameters

|  |
|--|
| Pixel Size: 18.5X18.5 $\mu\text{m}$                                    |
| True Line Pair Resolution: 12~ 14lp/mm                                 |
| Total Active Pixels: 1600X1200 pixels                                  |
| Frame Rate Options: 1f/s, 2.5f/s                                       |
| Digital Bit Options: 12-bit, 14-bit, 16-bit                            |
| ID number writable in chip   |
| Alone pixel trigger region and independent output                      |
| USB2.0 output  |
| Platform Drive: Windows\MAC\Linux                                      |
| Software for different applications is available and can be customized |

### Applications

Intraoral digital X-ray diagnose
